Once

in a Blue Moon centers

on Brynda Seymore, known to her friends as “Bryn,” a newspaper reporter and obituary writer. Bryn was orphaned at age 9

when her mother allegedly committed suicide.

She was raised by her

grandmother, who never spoke of her mother, and never knew her father’s

reporting a story in Houston about the 40th anniversary of the NASA

Apollo 14 moon landing, Bryn believes she may have found her father.

Following up on this possibility leads her to a small and eerie town

in Texas called Marfa, where strange lights and even stranger people

live.

At the same time, the possibility of romance—perhaps the last thing on Bryn’s mind—exists with a man who provides more information on her quest to uncover more about her mother.

Once

in a Blue Moon is a

conspiracy-lovers dream—with many twists and turns and a romantic

novel adventure all in one.
