

4,000 Doctors Accuse World Governments of Crimes Against Humanity

Over 4,000 doctors have officially taken a stance against the prevailing methods of treating (or not treating for that matter) those suffering from Covid-19.

The *Virginia Star* reported, "A 'Physicians Declaration' produced by an international alliance of physicians and medical scientists strongly condemns the global strategy to treat COVID, accusing policy-makers of potential 'crimes against humanity' for preventing physicians from providing life-saving treatments for their patients and suppressing open scientific discussion."

The Global Covid Summit, taking place in Rome Italy from September 12-14th, published their stance on their website for all to read.

The website states, "Though the declaration's signatories are diverse in their specialties, treatment philosophies and medical opinions they have risen up to take a collective stand against authoritarian measures by corporations, medical associations, and governments and their respective agencies. The objective of the declaration is to reclaim their leadership role in conquering this pandemic."

Video of the presentation of the declaration can be found [here](#).

Dr. Robert Malone, who reads the declaration in the video, was met with roaring applause during the final lines, " ... we invite the scientists of the world, who are skilled in biomedical research and uphold the highest ethical and moral standards, to insist on their ability to conduct and publish

objective, empirical research without fear of reprisal upon their careers, reputations and livelihoods ... we invite patients, who believe in the importance of the physician-patient relationship and the ability to be active participants in their care, to demand access to science-based medical care.”

Doctors who have expressed differing points of view than that of the main-stream narrative concerning COVID-19 have been ostracized and ridiculed. One of the groups who have garnered particular media attention is America’s Frontline Doctors who, “stand up for every American looking for the best quality healthcare.” Dr. Simone Gold, recently released a book on the topic entitled, “I Do Not Consent: My Fight Against Medical Cancel Culture.”

Another doctor who has made national headlines regarding her stance on Covid-19 treatment is Dr. Stella Immanuel.

Dr. Immanuel is a successful physician with an active practice in Houston as well as the founder of Fire Power Ministry in Katy, Texas. She devotes her life and resources to teaching believers everywhere to identify the sources of spiritual weakness, deception, and defeat to learn strategies of warfare to enable them to get and maintain their freedom.

Her book, “Let America Live: Exposing the Hidden Agenda Behind the 2020 Pandemic” is now available for preorder.

The Global Covid Summit Declaration is included below in its entirety.

Thousands have died from COVID as a result of being denied life-saving early treatment. The Declaration is a battle cry from physicians who are daily fighting for the right to treat their patients, and the right of patients to receive those treatments—without fear of interference, retribution or censorship by government, pharmacies, pharmaceutical corporations, and big tech. We demand that these groups step

aside and honor the sanctity and integrity of the patient-physician relationship, the fundamental maxim "First Do No Harm", and the freedom of patients and physicians to make informed medical decisions. Lives depend on it.

We the physicians of the world, united and loyal to the Hippocratic Oath, recognizing the profession of medicine as we know it is at a crossroad, are compelled to declare the following;

WHEREAS, it is our utmost responsibility and duty to uphold and restore the dignity, integrity, art and science of medicine;

WHEREAS, there is an unprecedented assault on our ability to care for our patients;

WHEREAS, public policy makers have chosen to force a "one size fits all" treatment strategy, resulting in needless illness and death, rather than upholding fundamental concepts of the individualized, personalized approach to patient care which is proven to be safe and more effective;

WHEREAS, physicians and other health care providers working on the front lines, utilizing their knowledge of epidemiology, pathophysiology and pharmacology, are often first to identify new, potentially life saving treatments;

WHEREAS, physicians are increasingly being discouraged from engaging in open professional discourse and the exchange of ideas about new and emerging diseases, not only endangering the essence of the medical profession, but more importantly, more tragically, the lives of our patients;

WHEREAS, thousands of physicians are being prevented from providing treatment to their patients, as a result of barriers put up by pharmacies, hospitals, and public health agencies, rendering the vast majority of healthcare providers helpless to protect their patients in the face of disease. Physicians

are now advising their patients to simply go home (allowing the virus to replicate) and return when their disease worsens, resulting in hundreds of thousands of unnecessary patient deaths, due to failure-to-treat;

WHEREAS, this is not medicine. This is not care. These policies may actually constitute crimes against humanity.

NOW THEREFORE, IT IS:

RESOLVED, that the physician-patient relationship must be restored. The very heart of medicine is this relationship, which allows physicians to best understand their patients and their illnesses, to formulate treatments that give the best chance for success, while the patient is an active participant in their care.

RESOLVED, that the political intrusion into the practice of medicine and the physician/patient relationship must end. Physicians, and all health care providers, must be free to practice the art and science of medicine without fear of retribution, censorship, slander, or disciplinary action, including possible loss of licensure and hospital privileges, loss of insurance contracts and interference from government entities and organizations – which further prevent us from caring for patients in need. More than ever, the right and ability to exchange objective scientific findings, which further our understanding of disease, must be protected.

RESOLVED, that physicians must defend their right to prescribe treatment, observing the tenet FIRST, DO NO HARM. Physicians shall not be restricted from prescribing safe and effective treatments. These restrictions continue to cause unnecessary sickness and death. The rights of patients, after being fully informed about the risks and benefits of each option, must be restored to receive those treatments.

RESOLVED, that we invite physicians of the world and all health care providers to join us in this noble cause as we

endeavor to restore trust, integrity and professionalism to the practice of medicine.

RESOLVED, that we invite the scientists of the world, who are skilled in biomedical research and uphold the highest ethical and moral standards, to insist on their ability to conduct and publish objective, empirical research without fear of reprisal upon their careers, reputations and livelihoods.

RESOLVED, that we invite patients, who believe in the importance of the physician-patient relationship and the ability to be active participants in their care, to demand access to science-based medical care. {eo}
