

Award-Winning Film Tells Story of Israel's Prophetic Rebirth

The prophets of ancient Israel saw visions of a future time when the desolated Promised Land would once again bloom, when the scattered Jewish people would return home, and when vineyards would again be planted on the mountains of Israel. These miracles are coming to pass in our lifetime and are the backdrop to the award-winning documentary film, *I Am Israel*.

Since its premiere, *I Am Israel* has aired worldwide as a television special, screened in over 7,000 congregations, and was specially invited to the Knesset in Jerusalem for a historic screening in the Israeli Parliament. *I Am Israel* takes viewers on a soaring journey through the Land of the Bible and introduces them to Jewish men and women whose very lives are a testament to the promises of God.

David Kiern, the film's director, said the film was made so that Christians around the world can experience the miracle of what God is doing in Israel and through the Jewish people. "Something prophetic and extraordinary is happening right now in the Christian world," said Kiern. "Millions of believers are developing a deep love in their hearts for the Jewish people and dreaming of making their own journey to the Land of the Bible. We made *I Am Israel* so that believers can be inspired by the power of God, and so they can share the miracle with their friends!"

I Am Israel is narrated by acclaimed actor, John Rhys-Davies, best known for his roles as Gimli in *Lord of the Rings* and Salah in the *Indiana Jones* movies. The film is full of

stunning aerial shots of Israel, giving viewers the chance to fly above the Land they read about in their Bibles.
