

Crushing Cancer With These God-Given Foods

Of the countless diseases that ravage the body, cancer may be one of the most devastating.

But what if there was a way to not merely avoid cancer—but reverse it?

Dr. Don Colbert recalls a time when he had numerous cancer patients come into his office. He shares on *The Jim Bakker Show* that he was at a loss as to how to help these cases of advanced cancer.

“And so the Lord had me go to a fellowship, an advanced nutritional fellowship for integrative medicine for how to treat cancer,” Dr. Colbert says. “So I studied under a lot of M.D., under some doctors, speakers, people from cancer institutes down in Mexico. And He kind of showed me a plan.”

Dr. Colbert says this God-given plan has everything to do with food.

“Cancers love sugars,” he says. “They’re sugar-feeders.”

Watch the video to find out which superfoods Dr. Colbert says are the most important aspect to cancer therapy.
