

Enemies Swarm as Israel Takes Case to International Criminal Court

They did it again.

Only weeks after some of the most violent attacks on Israel in years, more rockets rained down on Israeli communities.

Israel's enemies would like the world to somehow view them as victims, as they accuse Israel of war crimes and aggression. Yet once again, red-alert sirens were ringing out in the early morning hours as more terrorist rockets were launched at Israel from the Gaza Strip.

Along with the rocket strikes, sources report Palestinian terrorists have also used "arson balloons" and "incendiary kites" to set fire to Israeli farmland and infrastructure. A spokesperson for the Israeli Defense Forces (IDF) stated: "These are terrorist acts that endanger Israeli residents living in southern Israel and damage extensive areas in Israeli territory."

The enemies of Israel are swarming. They continue to attack Israel. Their previous attack just weeks ago even targeted an Israeli kindergarten where children went to learn and play. The terrorist group Hamas, as well as Iran, and other jihadist enemies are united in their goal to utterly destroy the Jewish state. Their depravity knows no limits—even putting young children at risk.

We told you how Iran launched unprecedented attacks on Israel. In the past, Iran hid behind Hezbollah and Hamas in its attempts target and attack Israel. Iran has even conducted ballistic missile tests with the words "Israel must be wiped off the map."

Israel's enemies are also attempting to cripple Israel without rockets. The United Nations (U.N.) is already teeming with anti-Semitism. Instead of defending Israel for this rampant deadly violence, and pursuing the terrorists responsible, they are financing them. We've told you about their \$65 million-dollar anti-Israel lawfare slush fund. We even discovered the U.N. may have provided storage facilities for Palestinian terrorists to store weapons.

We also reported on the International Criminal Court (ICC) pursuing a potential war crimes investigation against Israel. Despite barrage after barrage of rocket attacks on Israel, Palestinian terrorists are using the ICC, as well as the U.N. to further attack and ultimately eradicate Israel.

We recently told you the Palestinian Authority (PA), which has once again joined with Hamas, has gone to the ICC, to file more bogus charges against Israel because it dared defend its borders.

The audacity is incomprehensible. Attack an innocent state, then accuse them of war crimes when they defend themselves. Israel cannot stand idle and allow itself to be attacked. The ACLJ will not sit still either.

It's our moral obligation to defend Israel. We have engaged the ICC in defense of Israel—having already filed two briefs and preparing to file another very soon. We will hold the ICC accountable to the rule of law against this unfounded investigation.

We are also prepared to take further action if the U.N. has indeed allowed Hamas access to their facilities to wage their bloody attacks. We just filed a new lawsuit over the cover-up of U.N. fraud in its unending anti-Israel campaigns.

These attacks on our ally Israel must stop immediately. The Israeli people need *you*. Join us and defend Israel. {eoa}
