

Four Blood Moons: Do Signs in the Sky Point to Prophetic Events on Earth?

Four Blood Moons combines scripture, science, history and big screen live action. It examines a never-to-be-repeated celestial event occurring now that in years past was surrounded by major change, based on the *New York Times*' best-selling novel of the same name by John Hagee.

An array of historians, religious scholars and commentators appear in *Four Blood Moons* and offer their insight—filmmaker, speaker and author Dinesh D'Souza, radio host and author Dennis Prager, research originator Mark Biltz, noted author and historian David Barton, and author and television host Erick Stakelbeck to name just a few.

Four Blood Moons is a theatrical one night event—March 23.

It is rare that science, history and scripture align with each other, yet the last three series of *Four Blood Moons* have done exactly that. Are these the “signs” that God refers to in His Word? If they are, what do they mean? What is their significance for us today?

In his riveting and highly acclaimed book, Hagee explores the supernatural connection of certain celestial events to biblical prophecy—and to the future of God's chosen people and to the nations of the world.

Now, comes the movie *Four Blood Moons* produced by Rick Eldridge and directed by Academy Award® winner Kieth Merrill. These veteran filmmakers illustrate this fascinating phenomenon in a compelling docu-drama. Cinematic recreations of historical events from the United States, Israel and throughout the Middle East illustrate this story along with

expert testimonials from scientists, historians and religious scholars.

Just as in biblical times, perhaps God is controlling the sun, the moon and the stars to send our generation a signal that something is about to change. The question is: Are we watching and listening for His message?

The Most Important Event in History

Normally, a headline like that portends an outlandishly exaggerated story. *Four Blood Moons*, however, covers an event that occurred but three times in the last 500 years and is occurring again now. Blood moons are full lunar eclipses where the sun shines through the earth's atmosphere making the moon appear red. Only three times in the last 500 years have four blood moons appeared back to back (a tetrad), while coinciding with Jewish holy days. We currently are in the fourth tetrad. This time a solar eclipse also will occur, which will never happen again. The Bible speaks of "darkened sun" and "moon turned to blood" as associated with major events. What are the current four blood moons trying to tell us?

Historic Events Surround Four Blood Moons

In the past 500 years, only three times have four blood moons appeared back to back (a tetrad) and coinciding with Jewish holy days. Each time the world was changed. In 1493, all Jews had been expelled from Spain, and Columbus had just discovered the New World. In 1948-49, the modern state of Israel founded. In 1967-68, the Six-Day War was followed by Jerusalem returning to Israel. We are in the middle of the fourth tetrad. With world tension rising over the Middle East, what might be around the corner?

Unprecedented Time of Tension

The Middle East has spurred tension since the 1948 founding of the modern state of Israel. Terrorism and war have been the

norm. Now with the possibility of a nuclear Iran, anti-Semitism on the rise in Europe and terror on the rise worldwide, global tension is at new levels.
