Jerry Bruckheimer (*Pirates of the Caribbean*, *Confessions of a Shopaholic*) produces his first 3-D film with *G-Force*. The government's new covert operation, G-Force, is for agents that aren't your typical, um ... humans. This program trains animals in espionage—who knew guinea pigs, a fly, a mole and other animals could come together, fight evil and become heroes?

Armed with the latest and greatest high-tech equipment; these government spies are on a mission to stop a billionaire set on dominating the world. Kids young and old are sure to enjoy this comedy-adventure film.
