

God Heals 3 Deaf Ears During Randy Clark Conference

Who says miracles, signs and wonders aren't for today? God continues to do miraculous things through his warriors, including evangelist Randy Clark.

In February, at his Kingdom Foundations Conference in Orlando, Florida, Clark witnessed plenty of God's great works. One of the most astounding was that of a deaf ear opening. The shocking testimony led to another deaf ear opening.

During the conference, Clark learned of the story of Sarah, who, at 4 years old, used a bobby pin in her ear, imitating her older aunt using a Q-tip. Her eardrum was permanently perforated, causing several infections and vertigo. Despite two surgeries, doctors were unable to repair the damage, and Sarah suffered for decades with this condition.

Sarah felt encouraged to receive healing because the night before, she witnessed someone was healed who had 97% hearing loss. As the service was ending, she caught Clark and his team as they were leaving and requested prayer.

The team prayed with her for about 15 minutes. Clark used the five-step prayer model, which includes interview, diagnosis, prayer selection, prayer engagement and post-prayer direction.

Clark would say short prayers and test out Sarah's hearing; each time, it would improve. He would step farther away and ask her to repeat what he was saying. Eventually, he ran out of room. Her healing was restored!

As Sarah was sharing her testimony the next night, a gentleman on the second row stood to receive the healing testimony for himself.

Bill had lost his hearing as a Navy veteran. Initially, doctors at the VA hospital said he was at least 60% deaf but later decided he was 100% disabled. He depended totally on hearing aids to be able to hear and process information. Upon hearing Sarah's testimony, Bill stood to receive prayer, and God restored his hearing too.

In total, there were over 250 healings across three days at the Kingdom Foundations Conference. {eoa}
