

How Conservatives Capture Congress, Block Biden and Restore Our Republic

Read Time: 4 Minutes 42 Seconds

“All tyranny needs to gain a foothold is for people of good conscience to remain silent.”—Thomas Jefferson

I’ve read Billy Graham’s “Decision” magazine for 50 years. Now under Franklin Graham’s prophetic leadership it’s called “The Evangelical Voice for Today.” Along with Charisma magazine, I encourage you to read it.

This month’s cover features “The Midterm Elections.” Inside are articles: “America at the Crossroads; Midterm Elections Will Determine the Nation’s Path; Duty Calls.”

Franklin’s article “We Can Still Turn Back” declares, “On Nov. 8, tens of millions of voters will head to polls across America in the most crucial midterm election in recent history. To say that much is at stake is a gross understatement. It isn’t just control of Congress; it may be our last chance to stop the immoral and ungodly policies that have brought our great nation to the moral brink of disaster.”

You and your family are now suffering under the policies of a radicalized administration that has brought us from 1.3% inflation, energy independence, low gas prices, a secure border, respect of global leaders and the most vibrant economy in the world to the economic shambles of a deepening recession, skyrocketing crime, border chaos and “woke” indoctrination/sexualization of our children. We should be leading the world in producing oil, but because of “climate crisis/Green New Deal” deception, we are having to beg OPEC to provide us with more oil. They refused.

I strongly beseech you with all the urgency and fervency I can muster to make sure you vote November 8th! If you're a pastor instruct your people to vote; and vote only for candidates upholding biblical values in this critical midterm election.

This is not primarily a "political" issue—it's spiritual and moral.

Time for Transformational Turnaround

If you have not read my recent commentary on the "New 21-Point Contract with America," please Google it as it's foundational for what follows. A quick overview...

In 1994, traditional conservatives came together and pledged to the American people if they were given the majority in Congress they'd counter the advancing leftist agenda and take specific steps to turn things around. Most steps were accomplished and liberal Democrats didn't know what hit them. The GOP started restoring our country like Reagan did in his landslide victory over the disastrous presidency of Carter when inflation hit 18% and interest rates soared to 14%.

Conservatives gained 54 House seats; eight Senate seats; 12 governorships; and gained control of Congress for the first time in 40 years.

The same feat today would mean stopping the obscene spending causing record inflation; ending Democrat controlled committees (like the January 6 Commission); launching investigations into Hunter Biden and Hillary Clinton and the attack on our fuel industry. Also, possible impeachment proceedings on Biden for dereliction of duty for failure to uphold his oath of office. Meanwhile, we experience the cataclysmic consequences of his reprehensible "open border" invasion.

Jesus told us that we were to be "salt," holding back decay in our society and drawing His blessing. "Blessed is the nation

whose God is the Lord” (Ps. 33:12). So, let’s get going!

21 Bold Initiatives in the “New Contract with America”

- Honor our heritage enshrining freedom of religion (not from religion). We unashamedly affirm the centrality of God not as lip service but a living reality in humbly praying, “God Bless America.”
- Stop runaway inflation by serious cutbacks in spending and taxes.
- Restore our energy independence and stop draining our emergency reserves.
- Finish the wall, reclaim the border and policies established to protect our national security, putting an immediate stop to nations emptying their prisons, sending violent criminals (rapists, murderers) across our southern border (Epoch Times 9/23/22).
- Put in place safeguards for parental rights on school boards and children’s curriculum.
- Take specific steps to strengthen the supply chain.
- Stop social media censorship through bold and provocative Congressional action and accountability.
- Address ongoing airline chaos (flight delays and capricious cancelations) with oversight, accountability and enforced penalties.
- Curb the cartels dispensing drugs to gangs in our cities by strengthening our surveillance, law enforcement and penalties including the possible death penalty for drug dealers, who studies show are culpable for over 500 people’s deaths in their lifetime of distribution.
- Once and for all lower costs for prescription drugs.
- Defund the proposed 87,000 new IRS agents.
- Repeal the unconstitutional, unilateral student loan giveaway that will cost over \$400 billion as a reckless and irresponsible bailout when we have an unprecedented \$31 trillion national debt.
- Launch investigations into the FBI (recall similar

corrupt activity with J. Edgar Hoover) and the Department of Justice to expose corruption in phone seizures, unwarranted arrests of pro-life activists, pre-dawn “raids” and questionable surveillance.

- Bring to an end COVID-related mandates and government control over our individual health.
- Halt all federal coercion involving LGBTQ and CRT indoctrination in schools, government agencies, military and businesses along with attempts to secure transgender taxpayer-funded mutilation of children without parental involvement.
- Defund Planned Parenthood and deputize the Department of Health, Education and Welfare to raise awareness (as in similar “saving lives” campaigns on suicide, smoking, drunk driving, drug abuse) on the barbaric practice of taking the life of an about to be born baby in late term abortions performed until the moment of birth.
- Repeal unconstitutional laws abridging the “right to bear arms.”
- Require proof of U.S. citizenship to vote in national elections.
- Initiate a congressional investigation into U.S. withdrawal from Afghanistan and the specific monetary and military consequences of Biden’s unilateral actions which violated his vow to leave no Americans or allies behind.
- Reevaluate expenditures of trillions of taxpayer dollars for “climate crisis” and dubious Green New Deal ideas.
- Issue subpoenas to guarantee discovery and disclosure of all information suppressed by the Biden Administration and media regarding alleged unlawful actions of Hunter Biden, his father and Hillary Clinton.

Here’s the deal: Increasingly Americans are recognizing in

just 19 months the devastating consequences of an inept and incapacitated “accidental president” who not one candidate wants for their campaign! He cannot be allowed to continue bumbling about, calling out a congresswoman dead for a month while not being the problem solver America needs in these turbulent times.

If Mr. Biden is found guilty of law-breaking with his scoundrel son along with dereliction of duty with the border crisis (demonstrating his failure to “preserve, protect and defend the Constitution”) then articles of impeachment should be seriously considered as part of the new “Contract with America.” We must put a stop to the insanity that, left unchecked, will destroy America.

Pray. Vote. Engage. It’s time to restore our Republic. {eoa}
