

How This Spirit-Filled Pastor Cheated the Angel of Death

Senior pastor of The House Church in Modesto, California, Glen Berteau, apparently died after a cardiac arrest months before his book *Why Am I Not Healed?* was officially released. However, Berteau is alive and well and lives to tell about his “resurrection.”

His book explains how healing is a part of our spiritual inheritance as children of God, and it teaches believers how to stand firm on God’s Word for their healing. Out of nowhere, Glen goes into cardiac arrest and in the process of being rushed to the hospital, he dies and get shocked back to life a total of seven times.

Pastor Glen loves to share about the life and death experiences he had with the Lord as his family and congregation were contending for his life.

On the latest episode of *Awaken Podcast*, Michael Lombardo speaks with Pastor Glen Berteau about these miraculous events and how he encountered the angel of death. The doctors were saying he would never live, and if he did, he’d be completely brain dead from loss of oxygen to his brain. But they were proven wrong because of the hand of God and His healing power. Once he regained consciousness, the doctors kept stating he wouldn’t be capable of living a normal life because of the extent of the damage, and once again, they were proven wrong because God had a different story for this California pastor.

Now Pastor Glen boldly shares the story about how God rose him from dead and the revelation he received through this traumatic incident. Not only did his book release, but he was able to include the story of how God raised him up and defied the odds supernaturally by His grace. Tune in to be encouraged

that nothing is impossible for God! {eoa}
