

How You Can Renounce the Generational Curse of Sickness

You hear that God's people curse sickness. What does this mean? This is what we are going to discuss today. You receive a bad medical report. Is there anything you can do about it?

God gives you His blessing to curse Satan and his wicked works, including sickness and disease. So right now, obey His Word and curse this illness at its very root and see, just as Jesus cursed the fig tree (See Mark 11:12-25).

Use the sword of the Spirit; go deep into the root system and cut this disease off of your body. Curse the tap root and command it to dry up and die, and all other roots that stem off of this main root dry up and disappear supernaturally. Remind it often that it will not be able to resurrect itself in your body. Nor can it transplant or metastasize itself in any other part of your body.

Speak to the original seed of this disease, the seed of sin that was planted back in the Garden of Eden when Adam and Eve first sinned. Renounce this generational curse because you have been redeemed from it (see Gal. 3:13).

Dominate all seeds that this disease has produced to wither and die. Put them in their place beneath your authority in Jesus Christ; let them know who is boss and that they may not germinate ever again in your body or pass on to another generation. {eo}
