

Is UFO Disclosure Imminent?

Recently there was more activity in the halls of Congress concerning the UFO/UAP phenomenon. US Representative Eric Burlison revealed a video of a missile striking an unidentified aerial phenomena (UAP) at a House Oversight subcommittee meeting on UFO transparency and whistleblower protection on Sept. 9, 2025.

The video shows a glowing orb which in my opinion is what happens when the metallic UFO is flying with it's propulsion system on. In other words, the UFO is bending time and space in ways that are beyond our physics... at least for now and this creates the 'halo' around the craft.

As the video progresses we see a hellfire missile shot at it. It appears the missile is going to blow this 'glowing-orb' to smithereens but, that's not what happens. The hell-fire missile strikes the UFO and then promptly breaks apart and the UFO continues flying, essentially unscathed! How is that even possible?

There is a follow up to the film being shown in Congress as former pilots and other military personnel are then asked if they have ever seen anything like this. They all state, on the record, a resounding no. Then other Congressmen ask if we have anything like this or do our adversaries have anything like this. Again, all the witnesses give a definitive no.

Some of you might not think that this is a big deal, however, I can assure you as someone who has been studying the UFO/UAP phenomenon for decades that this is a huge admonition and in fact brings to yet another rung on the ladder of Disclosure. To be exact, the 23rd rung. (Please go to [for updates!](#)) We are headed toward what I believe will be full disclosure of the so-called extraterrestrial presence, which will change everything...essentially life as we know it.

So I'll segway into the new documentary film called Age of Disclosure. The directors name is Dan Farah and he has accomplished quite a feat, as Farah was able to interview many top government officials, congressman, Admirals, physicist and the former head of AATIP—Advance Arial Threat Identification Program, Lou Elizondo.

Just before the November 21st release date, Farah was also interviewed by Bret Baier on Fox News show about the film Age of Disclosure.

I have two questions, how does this director and filmmaker wind up on Bret Baier? How does Farah gain access to all these people he interviewed? Someone is opening doors for Farrah and that's fine, as the information needs to get out. However, in my opinion, this must be, it has to be, a managed agenda.

In the very beginning of the film at least a half a dozen people who are ex-military, ex-government officials, congressman, scientists, physicists and others state on the record, that we are not alone. This sets the tone for the rest of this film, as many whistleblowers come forward and state that not only do we have crashed craft, but we have the bodies, the non-human biologics recovered from these crashed craft.

This film in my opinion is groundbreaking and in fact is at the moment the top rung on my ladder of disclosure. It is rung number 24. I did a show on this recently and you can go to the link below and watch it for yourself.

A few weeks ago I also reported on the Vatican, declaring that they would baptize extraterrestrials. So why is all of this happening now? Why is it that our Congress is showing the

public films of UFOs/UAPs, which at one time was classified, as I mentioned above? How does Dan Farah get an interview with Bret Baier, on Fox News, to talk about his film? Why is the Vatican's chief astronomer bringing up the subject of extraterrestrial intervention? I can only conclude that we are on the cusp of something, perhaps something that is unprecedented.

Furthermore, David Grusch—one of the whistleblowers that appeared before Congress—when interviewed by Bret Baier stated on the record that he believed President Trump had been informed of all of the sightings and information pertaining to UFOs and perhaps much more than that. Perhaps President Trump will make an announcement soon in regard to the so-called extraterrestrial presence. This would be a mega-lever in that it would change everything.

In 1999 my first book was published by Zondervan publishing company. It was called *Nephilim, The Truth is Here* and delves into the burgeoning UFO phenomenon.

In that book I coined perhaps for the first time, the phrase the coming great deception. I posited that there would be an event, more than likely a global event that would change our world in a nanosecond. Fast-forward to the 2024 Super Bowl ad *Hello Down There*. In that one minute and 30 second commercial for the 2024 Super Bowl we see mile wide craft over New York, Paris, France, a diner perhaps in West Texas and finally a board room in Japan. In other words, the creators of the commercial are signaling that this is a global event.

Towards the end, one of the aliens aboard the ship who has grown frustrated at being ignored by earthlings who are too busy looking at their iPhones and tablets presses a button aboard his UFO and everyone's cell phone, tablet, computer, flashes with a picture of the grey aliens waving at them with the caption, "HELLO DOWN THERE!"

The commercial cuts to a woman in New York City who has been on her cell phone and she looks up and sees a very large UFO hovering over the skyscrapers of New York City. The woman's face is one of awe and almost reverence.

So let's walk through this. What happens to you and me as Bible believing Christians? Will our world leaders tell us that ET created all life on this planet, genetically manipulated early man, started the world's religions, started the world's civilizations, and now at this critical juncture in human history, these so-called extraterrestrials are back to usher mankind into a time of enlightenment in a golden age?

How does this affect the church? How does this affect you and me as believers in Jesus? Remember, we are told this:

In the beginning was the Word and the Word was with God. He was with God in the beginning all things were made by him, and without him was not anything made that was made (John 1:1-2).

That is what we believe that Jesus, the word, fully God, fully man, the only son of God, spoke everything into existence, and this is the foundation of our belief. The apostasy in 2 Thessalonians 2 is a complex concept with multiple interpretations, but it is consistently described as a great falling away from faith that will precede the final events of the end times. While some views connect it to the rapture, the most widely held interpretations see it as a large-scale spiritual rebellion led by the man of lawlessness.

So here's something to think about what happens if the scenario that I just outlined becomes reality, in other words, Trump announces that we have been visited by so-called extraterrestrials for a long time. Would that impact the average Christian? In my opinion, it most certainly would. Could this then lead to the apostasy or the great falling away that the second Thessalonians passage describes? It certainly

is something to ponder.

Are we being set up for what I have termed The coming great deception? My answer to this rhetorical question is a resounding yes! If our president and other world leaders declare that we are not alone—which as I stated earlier is repeated by people in the Age of Disclosure film—this will be a game changer. I think many people sitting in the pews will be searching for answers. Still, others might leave the church altogether. Will this then fulfill the prophecy of the Great Falling Away? The Apostasy?

In closing, let me state that disclosure of the so-called extraterrestrial presence seems to be ramping up. Will Trump make this historic announcement? Will other world leaders, including the Vatican jump on the 'extraterrestrial' bandwagon?

I'll leave you with this.

UFOs are real, burgeoning and not going away. This is the coming great deception.

L.A. Marzulli is an author, lecturer, and filmmaker. The author of twelve books including *The Nephilim Trilogy*, which became a CBA bestseller, Marzulli is a frank supernaturalist who lectures on the subjects of UFOs, the Nephilim, and ancient prophetic texts, presenting his exhaustive research at conferences and churches, and through appearances on numerous national and international radio and television programs.
