Based on the classic television series, *Land of the Lost* is a science-fiction comedy about three explorers who get sucked into a space-time vortex and transported back in time to dinosaur days. Dr. Richard Marshall (Will Ferrell), his assistant Holly (Anna Friel) and redneck survivalist Will (Danny McBride) are being chased by T-Rex and slow-moving reptiles.

The trio has no weapons and no skills to fight off these ancient beings. If they can escape, they'll be heroes. But if not, they'll be lost in this land forever.
