

Larry Tomczak: What We Suspected Is Surfacing and It's Scary

When we see "Danger: Bridge Out" on a sign, we know there's a problem ahead. This is where we're at currently in our country with justice being ignored.

Citizens are being denied fact-based information on the investigation into the Biden family finances and alleged influence peddling with adversary nations. The ultimate question: "Did Joe Biden illegally receive from his son Hunter and his brother Jim, money from China, Russia, Romania and Ukraine?"

Hunter Biden was finally caught and admitted to failing to declare close to \$20 million from "shell companies" and if Joe got any of it, he must resign for tax and conspiracy crimes. Scores have been shocked by the "slap on the wrist/like a parking ticket" fine Hunter received when similar tax evasion cases like Wesley Snipes, Chuck Berry and Lonnie Isley all got prison and hefty fines. "Equal justice for all?"

Additionally, is Attorney General Merrick Garland, like Attorney General John Mitchell who went to prison for his cover-up during the Watergate scandal, guilty of dereliction of duty in the whole operation?

On nationwide TV recently (7/9) Mark Levin who served as former chief-of-staff for Attorney General Edwin Meese, and is a regular New York Times best-selling author with over 40 years legal experience, stated the following: "Attorney General Merrick Garland is being accused of lying under oath—committing perjury—by multiple IRS and FBI whistle blowing officials. This would mean he would need to be impeached."

The Bible teaches that God is long-suffering, but there comes a time when “He humbles those who dwell in high Your judgments come upon the earth, the people of the world learn righteousness” (Isa. 26:5,9).

What millions of praying, patriotic citizens suspected is surfacing and it's scary! Hunter, holding back millions in federal taxes, lying on a gun purchase, cavorting with prostitutes, snorting cocaine, failing to support his “love child” and beyond are all realities but now the spotlight is slowly but surely starting to shine on Joe.

Uncovering a Cover-up

Joe Biden is on video adamantly declaring he had absolutely no involvement with his son's business dealings. The New York Post explicitly detailed examples where he did yet the media brazenly buried the story.

When Joe Biden was vice-president under Obama and point man for China, Russia and the Ukraine, he allegedly became involved in a clandestine, corrupt mega million-dollar global influence-peddling scheme led by his son.

Hunter capitalized on connections with his father whom he called “the big guy” to make big bucks. His business partner, Tony Bobulinski, admitted this publicly when Hunter's computer revealed, “the big guy got a piece.”

Joe reportedly used his position to facilitate dealings for his son as they flew on Air Force Two. Hunter enriched himself lavishly through placement on boards and in prestigious positions although he had zero experience. He was put on a Ukrainian energy board getting \$50,000 monthly! Joe bragged on video that he got the Ukrainian official who was looking into Hunter's activities fired or they wouldn't get a billion-dollar loan!

Six million dollars was wired from a China energy company to a

family partner of Hunter. Another big deal uncovered in the laptop was "10% held by H (Hunter) for the big guy."

All this came to light two years ago when the New York Post broke the story although it was banned by the corrupt corporate media as well as social media like Facebook.

Hunter Himself

Hunter Biden is 52 years old and until recently lived in a lavish home in posh Malibu where our tax money paid for his \$30,000 monthly Secret Service protection. He purchased a \$142,000 sports car and paints pictures that he's able to hawk for half a million dollars each. Hunter is a recovering cocaine and alcohol addict, writing in his memoir "Beautiful Things" that he previously was "smoking crack every 15 minutes." He's wealthy, divorced, has an out of wedlock little daughter born to an Arkansas stripper (he initially denied but was caught). He admits he was discharged after one month from the Navy after his dad swore him in at the White House!

Hunter probably wishes he was more careful with that infamous laptop. He said there was some water damage so he dropped it off at a nearby Wilmington, Delaware shop but never went back to get it. The repair man took out the hard drive and made a copy for Rudy Giuliani. The FBI got involved but the agent later said he "didn't know where it was at."

The media strangely wasn't interested and simply ignored the whole story except for the courageous editors at the New York Post.

History Repeats

In the 1870s President Ulysses S. Grant was exposed in numerous scandals and shady business dealings. He appointed 40 family members to well-paying positions. The corruption exposed in his administration came to be known as "Grantism."

A hundred years later in the 1970s, Vice President Spiro Agnew was suspected, investigated and discovered to have taken lucrative kickbacks from contractors when he was Maryland's governor who later became vice-president. Facing a felony, he resigned in disgrace. At the time I worked across the street from the White House praying as I do now for exposure.

The FBI basically did nothing with the laptop for over two years instead of investigating what's been exposed and accumulating facts for a grand jury hearing. Hunter faces charges of money laundering and violation of tax and foreign lobbying laws. House leadership is currently aggressively investigating the entire matter.

If Hunter is convicted his dad could pardon him before a trial begins but if that happens it would be perceived as a clear cover-up. Behind the scenes the Dems don't want Joe to run again because of his ineptitude and increasingly incapacitated state.

The aggressive Jim Jordan (R-OH) leads the charge, so pray justice prevails.

Here's the Deal: These events are happening because America is under judgment and the people of God are praying fervently for repentance for our nation and government officials (1 Tim. 2:1-3). The wheels of justice turn slowly but surely so let's stay in persistent prayer! {eoa}
