

Michele Bachmann on the Iran Deal: 'May God Help Us'

Today, through Obama's nuclear enabling, Obama is saying Iran is no longer a foe, but a co-equal nuclear weaponized friend – not because of any change in Iran's terrorist deeds, rhetoric, or announced twin goals of death to America and death to Israel, but because Obama says they are our friend and nuclear partner.

Iran, however, says it is fully committed to destroying both the U.S. and Israel.

The U.S. is Iran's stated number one enemy – only now Obama has given this energized Islamic terrorist nation the greatest weapon of mass destruction known to man. George W. Bush went into Iraq to stop that nation from using weapons of mass destruction against the U.S. and our allies. Obama went into the Iran agreement to make sure this terror state *gets* weapons of mass destruction. May God help us. Muslim hoards seeking to establish an Islamic global caliphate were stopped hundreds of years ago by the dedicated forces of Western Christendom at the gates of Vienna. Today in Vienna, that same European city, led by the feckless Obama and the powers of former western Christendom, was revealed an agreement with Iran that actively enables a *Shi'a* Muslim hoard to establish a *Shi'a* Muslim caliphate with nuclear powered weapons. May God help us.
