

Prophecy: The Bells of Restoration Are Ringing in America

Christy Johnston of the Everyday Revivalists ministry in Australia recently had a powerful vision that speaks to God's great plans for America.

"I believe that this dream is a blueprint of a new sound that the Holy Spirit is releasing across America, and I feel this is very significant for the door of destiny that the body of Christ is walking over the threshold of," she wrote in an article about her vision posted Thursday at the Elijah List website.

Johnston said she sensed an urgency to share her vision, and has sat with the Holy Spirit and sought the counsel of trusted voices in the prophetic movement as she interpreted what she saw. In the dream, there were ringing bells, a vision of Trump Tower, and the number 3. She also saw renowned revivalist Rodney Howard-Browne.

"I was walking up the steps of a grand majestic tower and as I entered the large doorway, I paused on the threshold," she wrote. "As I looked up, written over the doorway in gold writing was the title: 'Trump Tower' and directly above it was the number 3.

"I walked inside and standing in the foyer was a large crowd surrounding someone who was on a platform in the very center of the tower. As I got closer, I saw that it was Rodney Howard-Browne, and he started shouting with authority in a prophetic decree. He reminded me in this moment of a royal announcer. Rodney shouted out with authority in a loud voice three times: 'Ring the bells! Ring the bells! Ring the bells!'

“As he said that, I looked up and saw that we were standing beneath a huge spherical like steeple—a bell tower—and there were three gigantic gold bells above us. The crowd around me started pulling together in unison on the three ropes that hung down and were attached to the bells. They pulled slowly at first and the bells began to ring the most beautiful harmonized melody. As I looked up at the bells, I could physically see sound waves going out from the bells released through the windows of the tower and echoing out every which way.

“There was an excitement in the crowd as they began pulling on the ropes with more force and the bells started ringing faster and faster until they were ringing quite violently—but their sound was still majestic and beautiful. The only way I can describe it was that it sounded like a melodic war cry. I was watching the sound waves go out from the bells, and it was as though they carried a purpose, as if the sound was carrying a mission, as it came out from the bells and went out to every direction.”
