

Report: Hillary Clinton Made Numerous Trips to 'Orgy Island'

Friday, Charisma Caucus reported several seemingly unrelated stories about Hillary Clinton's email troubles that may, in fact, be connected after all.

First, we reported that a user of the social media outlet Reddit revealed what he believed to be evidence that the Democratic presidential nominee was connected to convicted child abductor Laura Silsby. Then, we reported that Blackwater Protection founder Erik Prince had related new details about the emails found on Anthony Weiner's laptop that pointed to possible money laundering, underage sex, pay-for-play and mishandling of classified material.

Now, *InfoWars'* Jamie White is reporting that D.C. insider Doug Hagmann has talked with actual investigators working on the case, who have shared some of the deeply disturbing details of the investigation. He confirmed much of the information in the earlier Charisma Caucus reports—particularly that Hillary Clinton did, in fact, visit convicted pedophile Jeffrey Epstein's "Orgy Island" on multiple occasions.

But, there is more. Much more. And it's much more disturbing.

"Based on my source, Hillary did in fact take part in some of the junkets on the Lolita Express independent of and with Bill Clinton, and it also involved Huma (Abedin)," Hagmann said. "(The information in the 650,000 emails) involves the Saudis, very big money and interests in the Middle East, and it involves Hillary, Huma and, to a much lesser extent, Anthony Weiner."

He also dropped an additional bombshell: The FBI, contrary to

media reports, did not destroy the laptops it obtained from Abedin and Clinton aide Cheryl Mills. Although they were handed over as part of a limited immunity agreement, which included the destruction of those devices, they are being analyzed by FBI agents, he said.

And Weiner's recent admission into a "sex rehab" clinic was done not just to protect him legally but to protect his physical well being. Hagmann said the Clinton Machine is fearful of what he might say-viewing him as a "loose canon."

Independent sources have confirmed to Charisma Caucus that extremely damaging information-not just for the Clintons but for Democrats and other influential people involved with government-are about to be revealed. They indicate the information could lead to a "complete meltdown of the government."
