

The Star of Bethlehem

Sound Enterprises | Documentary

“The Star of Bethlehem—was it legend or a miracle?” For centuries, scholars have debated whether a star truly marked the location of Christ’s birth, as the Bible states, or whether the early church created a mythical story of a star to dramatize the birth of Jesus.

This new documentary from producer Stephen McEveety of Mpower Pictures (*The Passion of the Christ*) examines Scripture, ancient writings and astronomical facts, and claims to prove the star’s existence. Viewers will also learn that the star had nine separate features, established a date for Jesus’ birth and death, and holds significance on us today.
