

UFO Disclosure Explodes: Congress Talks Hybrids, Non- Human Biologics and Secret Programs

Members and former members of Congress are openly discussing UFOs, non-human biologics and hybrid beings, and the claims are escalating rapidly.

Reports now include military briefings describing secret programs tied to recovered craft, unexplained biological material and hybridization experiments. What was once dismissed as fringe has moved into the mainstream as officials with access to classified environments push for answers.

The demand for disclosure is intensifying, and the silence surrounding these programs is becoming impossible to ignore.

Officials are now pointing to something beyond the idea of life from another planet. Descriptions of interdimensional entities, advanced technologies that defy known physics and restricted access to critical information are reshaping the conversation.

Lawmakers attempting to investigate have encountered resistance, blocked access and layers of secrecy that raise serious concerns about what is being hidden. Reports of intimidation, missing insiders and a growing culture of silence are fueling urgency as the public begins to realize the scope of what may be unfolding.

Scripture already lays the foundation for what is taking shape.

The emergence of hybrid beings, spiritual corruption and a global deception reflects patterns established in Genesis and reinforced throughout the New Testament. This is not a distant theory but a present reality that is moving quickly into full view. The conversation surrounding UFOs and UAPs is shifting into a spiritual battleground that will impact faith, truth and the understanding of creation itself.
