

# Why Crazy Is the New Normal

No, you haven't lost your mind.

Yes, America has.

If someone just 20 years ago had said, for starters, that we'd someday elect an anti-American president who would intentionally flood our borders with millions of illegal immigrants and Islamist "refugees," that we'd soon celebrate as "heroic" a former Olympic champion for mutilating his body and pretending to be a woman, that we'd have five extremist lawyers on the Supreme Court unconstitutionally force the radical redefinition of marriage to mollify people with same-sex fetishes—you might call that person crazy.

Well, crazy is the new normal. America has lost its mind. We've snapped. Anyone with eyes to see, ears to hear and a brain to think knows it.

But why? How did it happen? What exactly caused America's moral GPS to send our nation headlong into oncoming traffic?

And can anything be done to fix it?

Maybe once in a generation are we so graced with a communicator like veteran journalist and best-selling author David Kupelian. His matchless ability to unpack the complicated issues of our day with simplistic precision is nothing short of genius, a gift from God he has shared once more in his latest book, *The Snapping of the American Mind: Healing a Nation Broken by a Lawless Government and Godless Culture*.

As I've said before, when David puts pen to paper, it "has the same effect on your brain that yawning has on your ears at high altitude. Things just suddenly pop with crystal clarity." The closest comparison I can make to David Kupelian is author

and Christian apologist C.S. Lewis. As a Lewis enthusiast of the first order, I don't make that comparison lightly.

In, *The Snapping of the American Mind*, Kupelian one ups himself by exploring, in lucid detail, the root cause of our current age of lawlessness and moral anarchy. Yet, somehow, he manages to leave us filled with hope for American revival and renewal. *Snapping* is just the book America needs for a time such a time as this.

In it you will learn:

- How the left has succeeded in redefining not just “marriage,” but the rest of Americans’ core values, from “equality” to “justice” to “freedom”;
- Why America, unquestionably the least racist nation on earth, is now being portrayed as a deeply racist pariah state;
- Why the United States is intentionally being flooded with millions of needy, dependent, Third World immigrants;
- How a group that amputates healthy body parts and has a 41 percent attempted suicide rate is officially declared “normal,” yet new “research” suggests conservatives have malformed brains;
- Which of the two major U.S. political parties has a far higher incidence of mental illness;
- Why Americans today are more stressed-out, confused, conflicted and addicted than at any time in the nation’s history—and where this ominous trend is leading;
- And much, much more ...

Kupelian, who is vice president and managing editor of *WND (WorldNetDaily)* and editor of *Whistleblower* magazine, authored two previous blockbuster bestsellers, *The Marketing of Evil* and its sequel, *How Evil Works*.

“The progressive left under Obama,” he writes of his new book,

“is accomplishing much more than just enlarging government, redistributing wealth and de-Christianizing the culture. With its wild celebration of sexual anarchy, its intimidating culture of political correctness and its incomprehension of the fundamental sacredness of human life, it is also, whether intentionally or not, promoting widespread dependency, debauchery, family breakdown, crime, corruption, depression and addiction.”

“Surveying this growing chaos in American society,” notes the book’s summary, “Kupelian exposes both the utopian revolutionaries and their extraordinary methods that have turned America’s most cherished values literally upside down—to the point that madness is celebrated and normality demonized.”

In essence, *Snapping* untangles the modern-day manifestation of the timeless biblical truth found in Isaiah 5:20: “Woe to those who call evil good, and good evil; who exchange darkness for light, and light for darkness; who exchange bitter for sweet, and sweet for bitter!”

But unlike the woeful occupant of 1600 Pennsylvania Avenue, Kupelian offers a substantive path forward—real hope and real change that will fundamentally repair what the “progressive” left has “fundamentally transformed.”

“I don’t give up hope,” said Kupelian on the radio show Coast to Coast AM with George Noory. “I mean, you could say, if there’s no hope then what do you do? You go off, you drop out, you live for yourself, for your family, and you try to live a good life. No; too many people have fought and bled and died to help this country and to help strangers in foreign lands. There’s still half the country that has not had their mind snapped.”

Which half of the country maintains majority influence over the whole, may determine whether we have any future at all.

*The Snapping of the American Mind* is good medicine for an America gone mad.

Pick it up today. Read. Learn. Plan.

Because America's time may be running out.
