

Why You Need to Stop Praying About Evil Spirits Immediately

Jesus never prayed about an evil spirit, and neither should we.

So many people are harassed by evil spirits. You would not believe how many people talk to me about evil spirits. I was recently talking to someone who told me about someone they know who was influenced by evil spirits.

Evil spirits are everywhere. They try to influence people. But keep this in mind: They cannot just attack you. Sometimes people think there are evil spirits around where there aren't.

Evil spirits have no power apart from what they can influence somebody to do or what they're given permission to do. They can't cause sickness without your permission. They can't cause you problems without your permission.

Something or somebody must allow them to operate in your life, or they can't be there. They are almost always a result of curses. Curses give evil spirits a legal right to operate in the life of a person.

I talk about this topic more in depth in my latest podcast, so make sure to listen to it [here](#).
