

Will There Be Angelic Activity in the End Times?

Spiritual warfare has affected humanity from the beginning of time, and will continue to do so until Christ returns, author Chuck Missler says.

But the presence of angels may not be on the plane we expect, he says.

“We live in a digital, simulated reality,” Missler says. “What we call physical reality has limits. ... The great discovery of 20th-century science is that the universe is not infinite, it’s finite.”

He boils it down to Daniel 10 to address to warfare that happens within the universe.

Watch the video to see Missler’s explanation.
