

William Branham's 7 Prophetic Visions That Came To Pass

Healing revivalist William Branham had seven visions in 1933, all of which have come to pass, according to Jim Bakker.

For one vision, he saw Mussolini invading Ethiopia and the African country falling at the Italian dictator's feet.

In another, Branham saw America could be drawn into a world war against Germany.

Next, he foretold the rise of the "isms," with the flourish of communism.

Now, nearly 80 years later, it appears Bakker had similar dreams about the future of America.

Does this mean Bakker's predictions will come to pass like Branham's? You'll need to watch the video to see.
