

A Giant Step to a One-World Government?

In less than two weeks, Joe Biden plans to cede U.S. sovereignty over our health affairs to the United Nations' World Health Organization (WHO). If successful, WHO will be able to impose its rules – including shutdown orders, border closures and vaccine passports – *at will*.

In January, the Biden administration quietly submitted to WHO a series of amendments that would change its International Health Regulations (IHR).

Biden's proposed amendments would cede American sovereignty, as well as the sovereignty of all the other 193 member states, to WHO. This would place the health decisions of % of the world population under the control of an unelected, unaccountable foreign governing body.

These amendments have little to do with health and safety, and everything to do with *control*.

Do not let Joe Biden put America under the U.N.'s One-World Government! Congress must demand that Biden withdraw all WHO amendments!

Under these amendments, WHO could declare a "shutdown," ordering everyone to stay in their houses. WHO could declare what businesses are "essential." Churches will not be on WHO's list.

WHO would have authority to close our borders and impose vaccine passports. In March 2022, WHO began pushing international vaccine passports. Immediately, two continents complied.

WHO could dictate whether a doctor may prescribe, or a

pharmacy dispense, ivermectin or hydroxychloroquine (HCQ). WHO could fine individual violators, including the United States, for noncompliance.

George W. Bush adopted and agreed to live under WHO's regulations back in 2005. Donald Trump began the process to pull America out of WHO. Biden reversed Trump. Now Biden's proposed changes will cede sovereignty to WHO.

WHO member states will vote on Biden's proposed amendments *this month*. If just 40 other countries agree, the U.S. will be bound to comply.

WHO will meet May 22-28 to vote on Biden's amendments.

We must now call on Congress to *demand* it takes an immediate stand against Biden's attempts to put Americans under the thumb of WHO.

Congress must demand that Biden withdraw all WHO amendments!

This is extremely urgent. We must compel Congress to act now to save America from one-world governance.

If you thought the COVID shutdowns and mandates by our own federal and state governments were bad, imagine what WHO could do to us!

Tell the legislators to do everything in their power to stop Biden from ceding authority to WHO. We need "all hands on deck."

Liberty Counsel has a very full docket of vital litigation fighting tyrants who want to subvert American liberty on many fronts. I will update you on our cutting-edge litigation as soon as possible. {eo}
