

A Marine Faces Dishonorable Discharge—You Can Probably Guess Why

From 2008 to 2012, the Obama-Biden administration decimated the military, running ideological “enemies” out of the service. Biden has been purging the military once again.

Look at the Afghanistan situation to see what Biden and his secretary of defense have done to “sanitize” the military of patriotic men and women.

We are receiving desperate calls from service members—pleading for help! Help us help them!

“Irregardless of all the existing laws, he will shortly be going to the brig ... Unless he has some sort of legal counsel, he will end up being dishonorably discharged,” wrote a distraught father.

“The chaplain is no help, and the JAG [military attorneys] won’t even talk to him,” the worried father continued. The Marine’s dad worries that nothing can be done until after his son is sent to the brig.

It is illegal to lie to military members, telling them they have no religious freedom, and it is also a lie that the Pfizer shot is FDA approved. It is not. BioNTech’s Comirnaty is approved, but it is not available and will not be for some time.

“We are being told that none of our Religious Exemptions will be approved, that putting one in is pointless,” one deployed armed forces officer wrote. “To me, this means that Freedom of Religion written in our Constitution is also pointless. We need help as our rights are being blatantly stripped from us

and thrown in our faces.”

An active-duty Air Force member wrote: “I have a lot to lose. Retirement, insurance. I have 5 kids and a wife. I cannot afford to lose my job.”

Our service members fought, bled and died for our freedom. They are not lab rats. They have rights!

The wife of a high-ranking member of the U.S. military’s elite special operations forces told us, “We are actively seeking wisdom and legal protection, as both my husband’s job and retirement are at risk after 18 years of service.”

Corrine’s husband spent nearly two decades fighting in America’s longest war. He has witnessed and endured more than most people can imagine. Corrine’s husband is only two years away from retirement with full honors and benefits, which he earned with his own blood, sweat and tears fighting for freedom.

“We realize our future is hanging in the balance,” writes Corrine, “but we also know we must fight for our rights at this time, *because more oppression is to come if we do not fight for truth and liberty now*” (emphasis added).

These brave men and women defended our freedom. Now it is time for us to defend them! {eo}
