

WATCH: Attempting to Divide Israel Comes With Dire Consequences

Are “billion-dollar” catastrophes such as the “perfect storm,” 9/11 and Hurricane Katrina related to the United States’ attempts to help divide the biblical heartland into two states? Author and White House Correspondent William Koenig is convinced of it.

On a recent appearance on the Jim Bakker Show, Koenig explained the correlation of America’s efforts to convince Israel to give up Judea and Samaria for a future Arab State and some of the greatest catastrophic events to hit the U.S. in the past 15 years. He also talks about France’s role in turning up the heat on Israel, and what happened in that country recently.

“God rebukes this every time it happens,” Koenig said.
