

Biden Makes Dire Prediction of Coming 'Second Pandemic'

President Biden wants more money from Congress to fight what he calls "the second pandemic."

Video clips of Biden making the dire pronouncement have been going viral on social media. One version of the clip has over a million views.

"We need more money to plan for the second pandemic. There's going to be another pandemic," Biden declared on Tuesday at a White House vaccine event.

"We have to think ahead. And that's not something the last outfit did very well. That's something we've been doing fairly well. That's why we need the money," he said.

The world has seen numerous pandemics throughout history, but not often before the last pandemic has even wound down.

For example, pandemics of the bubonic plague occurred hundreds of years apart in A.D. 541, 1347 and 1894.

And various extreme versions of the flu caused pandemics during the 20th and 21st centuries, but they were decades apart.
