

Charisma News Briefs: The Supernatural Phenomena Coming to America

The Signature of Christ?

Not many are aware of this, end times expert Michael Snyder says, but the paths of three eclipses will soon combine to form a giant “Aleph” over America. What is an “Aleph?”

It is the first letter in the Hebrew alphabet. But is the fact that a giant “Aleph” will soon be completed over the United States a significant event? Snyder says he believes the answer is “yes.”

In Luke 21:25, it reads, “There will be signs in the sun and the moon and the stars; and on the earth distress of nations, with perplexity, the sea and the waves roaring; ...”

“We should be watching for such things,” Snyder says. “In order for an eclipse to happen, both the sun and the moon must be involved. I have previously explained that the Great Eclipse of 2017 will combine with the “Great American Eclipse” of 2024 to create a giant ‘X’ across America.

“On April 8, 2024, another ‘Great American Eclipse’ will make headlines all over the planet. The path of that eclipse will cross over the states of Texas, Oklahoma, Arkansas, Missouri, Illinois, Kentucky, Tennessee, Michigan, Indiana, Ohio, Pennsylvania, New York, Vermont, New Hampshire and Maine. If you plot the paths of the 2017 eclipse and the 2024 eclipse on the same map, you will clearly see that they combine to form a massive ‘X’ right over the heartland of the continental United States.”

On October 14, 2023, an annual solar eclipse will cross the US

from Oregon to Texas. Snyder says that if you overlay the path of that annual solar eclipse on the top paths of the Great American Eclipse of 2017 and the one in 2024, you will see that these three eclipses actually combine to create a giant “Aleph” across America.”

In a book by Samuel Koki titled “I Am the Aleph-Tav,” Koki reveals that the “Aleph” is a “Hebrew character symbol believe to be the signature of Christ,” found only in the Hebrew Bible.

Natural Disasters Happen Within God’s Providence

Evangelist Billy Graham once said that natural disasters are a “megaphone” from God and they teach us various lessons. He said they show us the “uncertainty of life.”

That includes the recent heat waves that have hit not only the United States but also other continents including Africa, sending temperatures soaring to almost unbearable levels. It is causing severe and lengthy drought, which the World Health Organization says is causing some countries to experience incredible famine and the “highest levels of severely malnourished children” in years.

A “prolonged drought” and heat wave in the Horn of Africa has already had a major impact, putting great strain on local healthcare services, says WHO Director-General Tedros Ghebreyesus, who says climate change will drive a surge in “extreme weather events” in 2023.

“Over the coming months, we expect a range of extreme weather events, including droughts, floods, hurricanes and heatwaves, all of which harm human health,” Tedros says.

What lessons is God trying to teach us through this extreme heat? Only He knows, but Graham once said that “we must see God in natural disasters and that when we look at the news and see these disasters, it’s like a preview of the natural

disasters that will some day come upon the earth.

“When you look at the second coming of Christ, you find many different natural disasters connected with it,” Graham once said.

“And there will be earthquakes in various places, and there will be famines and troubles. These are the beginning of sorrows” (Mark 13:8). {eoa}
