

# Clay Clark's ReAwaken America Health and Freedom Tour Is Making a Difference in America and in the World

Clay Clark's ReAwaken America Health and Freedom Tour featuring Gen. Michael Flynn held its latest event in Colorado Springs, Colorado, Sept. 25-25. Dr. Bryan Ardis and attorney Thomas Renz presented new and compelling information the American people must know.

America has traditionally led the way for the rest of the world to make health care decisions according to the Centers for Disease Control and the Food and Drug Administration's research and recommendations. However, Ardis and Renz shared facts revealing that when it comes to treatment of COVID-19, America is failing not only Americans but the people of the world.

At the end of 2020, an estimated 550,000 Americans were killed due to COVID-19 related issues, Ardis said. This means 25% of all deaths worldwide attributed to COVID-19 were Americans, when America represents only 4.5% of the world's population. This, along with Ardis' personal experience of losing his father-in-law due to ill-advised hospital protocols, has placed him on a relentless mission to discover truth and educate the world. To date, the total dead supposedly from COVID-19 in 17 months is 720,000 Americans, Ardis said, all because of Dr. Fauci's deadly treatment, not from Sars-Cov-2 infection.

"Anthony Fauci is the greatest serial killer in American history," Ardis said.

Since May 2020. Ardis has publicly claimed Fauci selected the

drug Remdesivir as the preferred treatment for COVID-19 with full knowledge the drug is among the most deadly. The Associated Press contacted and tracked Ardis to fact-check him for the entire year of 2020. Ardis' reply? "Associated Press, fact-check this! From May 2020 I've stated nonstop this was going to be the Anthony Fauci genocide. You do your fact-checking, and if you do not run an article that includes the objective data, I will hold you to account for being complicit for killing Americans."

The data to support Ardis' claim is easily accessible and provides clear and compelling evidence Fauci indeed was aware of the high death rate associated with the use of Remdesivir. In a May 1, 2021, memo Fauci wrote citing the Dec. 12, 2019, article published in the *New England Journal of Medicine*, reporting on a 2018-2019 study for treatment of ebola virus conducted in Africa that used remdesivir and three other therapeutics. Remdesivir proved to have the highest mortality rate (53.1%) of all the drugs tested. Remdesivir was known to cause acute kidney failure as a result of that study and was pulled from the study. Add to that, as director of the National Institute for Allergy and Infectious Disease, a department of the National Institutes of Health, Fauci had knowledge of the ebola trial since it was funded through the NIH. The question remains: *Why would Dr. Fauci mandate a drug proven to kill nearly 54% of its recipients?*

From the content Renz presented, the audience learned that 25.9% of patients receiving Remdesivir died while hospitals paid between \$ and \$ for a single patient's course of treatment. This was compared to patients who were treated with Ivermectin, where 3.5% patients died with the cost for hospitals of \$ per patient. The question to be answers is: *Why would hospitals spend thousands of dollars for a treatment with a high mortality rate, compared to another treatment that has an exceedingly low mortality rate for a much lesser cost?* Could it be the fact the Centers for Medicare and Medicaid

Services are bribing hospitals to select Remdesivir with a 20% bonus payout they receive by using specific codes to get the money?

Since the Colorado Springs event, Ardis and Renz have learned even more facts that demand the FDA and NIH be held to account for concealing known serious side effects because of the current mandated COVID-19 treatment protocols. The Friday following the ReAwaken America tour stop in Colorado Springs, the Department of Defense has come into question for concealing knowledge that the so-called vaccination is not safe, and certainly not effective, with extensive knowledge of the significant side effects the jab is known to cause. Plus their newly discovered document reveals 71% of COVID-19 side effects occurred in fully vaccinated individuals, and 60% of hospitalizations involve fully vaccinated people. The DOD openly state the efficacy of vaccines weakens over time and the best immunity is natural immunity.

Renz shared the FDA had noted on its official website that the organization would monitor for side effects using the data from the Centers for Medicare and Medicaid Services, whose findings would be limited to those within their programs, basically the older segment of our population. Which they seem to have done in part, but they have failed to publish their findings. Ardis explained he found the NIH updated its published treatment protocols on July 8, 2021, to include Ivermectin as a viable treatment. This begs the question: *Why is Ivermectin listed as an acceptable treatment with absolutely no public announcement, news coverage or any measure of fanfare?* Could it be the 64 studies around the world that have proven Ivermectin the most effective and safe treatment are providing truth genuine fact-checkers can't deny?

Ardis and Renz are working closely together to alert senators of these and many more facts concerning the American health care systems to bring into account those who have perpetuated

what are clearly crimes against humanity.

As the ReAwaken America Tours continue, more and more information is learned and shared for the benefit of people knowing truth about our health and freedoms. Only two events remain, San Antonio Texas, Nov. 11-13, 2021, and Dallas Texas, Dec. 10-12, 2021. At the time of writing this article, only 138 tickets remain available for San Antonio, with the Dallas event already selling 42% of tickets.

General admission tickets are available for \$, with VIP tickets selling at \$. There is an opportunity for people who cannot afford the general admission ticket price to apply for a ticket at a price they can afford. Those interested in tickets can visit the online address and use the "Request Tickets" feature from that page. When someone from Clark's team contacts you, mention "Charisma" for an additional discount. With each event selling out in advance, people are encouraged to secure their tickets right away. An additional website, is provided to offer downloads of the many researched truth claims presented at the Tour Stops.

The events are live streamed on Rumble and other platforms. Visit the websites to learn more:

"These vaccines are not safe and are clearly ineffective," Renz said. "If our bodily integrity and our children's freedom and future are not worth fighting for, what is? I'm confident if people stand together, we'll win this, and we're making great progress. People are starting to see the essentiality of fighting for our bodily integrity and personal freedom to determine our own health and future."
