

CN Morning Rundown: Audit Expert Reveals Significant Vote Discrepancy in Arizona County

Here's a quick summary of the top stories on :

Audit Expert Reveals 74,000-Vote Discrepancy in Arizona County During 2020 Election

Audit expert Doug Logan revealed during Thursday's Arizona state election hearing that auditors had reported there 74,000 mail-in ballots received and included in the 2020 election that were never recorded as being mailed out.

The Arizona election hearing was shown live Thursday on the Right Side Broadcasting Network:

"Just to be clear, here in the state of Arizona, there are EV 32s and EV 33s," Logan said. "EV 32s are supposed to keep a record of when a mail-in ballot is sent, and EV 33s are supposed to be a record of when the mail-in ballot is received."

Newsom Pays the Price for California Church Restrictions

One year after Liberty Counsel filed the lawsuit on behalf of Harvest Rock Church and Harvest International Ministry against California Gov. Gavin Newsom, the full and final settlement of \$1,350,000 was paid Thursday.

On May 17, 2021, the federal district court approved the first statewide permanent injunction in the country against COVID restrictions on churches and places of worship. Under the statewide permanent injunction, all California churches may hold worship without discriminatory restrictions. California

was ordered to pay \$1,350,000 for attorney's fees and costs.

The money will be used by Liberty Counsel to continue litigation on behalf of other churches against COVID restrictions, including a case pending at the Supreme Court. A portion of the payment also will be used to pay off the mortgage on Liberty Counsel's ministry center in Washington, D.C., which hosts many Bible studies and various religious gatherings. Ironically, the payment from California, which had the worst COVID restrictions on churches and places of worship, will be used to advance Bible studies and worship in the nation's capital.

Archaeologists Uncover Potential Proof of Hebrew Judge Gideon

On Monday, July 12, the Israel Antiquities Authority announced the discovery of a unique piece of pottery dating from 3,100 years ago with a famous biblical name written in ink.

The jar handle was discovered in a storage pit in the ground in Khirbet el-Rai—the possible location of “Ziklag”—and bears Gideon's nickname of “Jerubbaal,” which is first mentioned in Judges 6.

“Therefore on that day he called him Jerub-Baal, saying, ‘Let Baal fight him, for he tore down the altar of Baal’” (Judg. 6:32). {eo}
