Natural Disasters Are Just the Beginning, End-Times Expert Says

Why does our planet keep getting hit by “historic disaster” after “historic disaster”? Over the past couple of years, an extremely unusual series of hurricanes, tornadoes, droughts, floods, earthquakes and volcanic eruptions has rocked the globe.

Authorities keep telling us that “everything is normal,” but the truth is that there is absolutely nothing about any of this that is “normal.” Major changes appear to be happening to our planet, and that has enormous implications for our future. Unfortunately, the corporate media gives very little attention to the major disasters that take place outside of the United States, and so most Americans don't even understand the seriousness of what we are facing.

Over the weekend, the Hunga Tonga-Hunga Ha'apai volcano in Tonga experienced a “once in a thousand years explosion.” This eruption sent a three-mile-wide mushroom cloud of red hot ash, steam and gas 12 miles into the air.

Has the Church Made The 'Big 3' Changes Since COVID Started?

2020, When Everything Began to Change

YouTube Labels Megachurch Pastor's Bible-Based Sermon on Gender as Hate Speech

YouTube has censored a Bible-based sermon, labeling it as "hate speech" because it isn't pro-LGBTQ+.

Pastor John MacArthur of Grace Community Church in Los Angeles, CA preached a sermon Sunday about biblical sexuality, which as CBN's Faithwire reported, was part of an effort by pastors across North America to protest a new Canadian law that took effect Jan. 8 after being pushed through Parliament with little debate.

The concern is that Canada's Bill C-4 is broadly worded and could, in effect, ban biblical teachings on sexual ethics and might even limit personal communications on the subject. {eo}
