

CN Morning Rundown: Signs in the Heavens? Blood Red Skies in China and the 'Super Flower Blood Moon'

Here's a quick summary of the top stories on :

Signs in the Heavens? Blood Red Skies in China and the 'Super Flower Blood Moon'

Unique weather conditions in China's port city of Zhoushan caused the sky to turn blood-red earlier this week, leaving many of the city's residents wondering if the end of the world had come.

A sense of panic could be heard in the voices of some of the residents as they recorded the eerie phenomenon, which was seen under thick layers of fog, according to The Daily Mail.

Others thought the red sky was an evil omen for China.

The Antichrist Agenda: Marvel and DC's War on God

Christian media company Good Fight Ministries has released the first installment of its seven-part Marvel & DC's War on God series.

Titled *The Antichrist Agenda* and narrated by Pastor Joe Schimmel, the company says the 150-minute film "documents how popular comics and the movies that they have spawned are riddled with anti-Christ themes that glorify gratuitous violence, sexual perversion, blasphemy, and the occult."

"Many leading comic book writers have admitted that they are using seduction, manipulation, the occult and even the Bible to influence children to view the God of the Bible from a

twisted slant,” Pastor Schimmel says.

End-Times Expert: Is ‘Meltdown’ the Correct Term to Describe the State of the US Economy?

I have really been struggling to come up with an accurate way of describing the current state of the U.S. economy because none of the traditional labels seem to apply. Inflation is out of control, and that normally happens when an economy is overheating.

But of course, the U.S. economy is not overheating. In fact, if the U.S. gross domestic product (GDP) falls once again during the second quarter, that will officially confirm that we are actually in a recession right now. There are some who have suggested that “stagflation” is a good description of current economic conditions, but the truth is that what we are facing is so much worse than anything that we dealt with during the 1970s.

Let me give you an example. The Bureau of Labor Statistics just informed us that the consumer price index is 8.3% higher than it was a year ago. {eo}
