

Half of the US States Are Perpetrating This Invasion of Your Privacy, God-Given Freedoms

The World Health Organization just launched a new effort to digitize your COVID-19 PCR test results, vaccine status and private medical information so it can all be shared “globally.”

In a document entitled “Digital Documentation of COVID-19 Certificates: Test Result: Technical specifications and implementation guidance,” released March 31, 2022, the WHO is pushing to have your COVID test results “digitally documented via an electronic certificate.”

The WHO “proposed to all countries the concept of Digital Documentation of COVID-19 Certificates (DDCC), a mechanism through which a test report that documents a person’s SARS-CoV-2 diagnostic test result can be used to generate a certificate as proof of that SARS-CoV-2 diagnostic test result.”

This digital medical certificate includes the following data: “Who has been tested, the type of test conducted, the sample collection date and time, the test result, and other data in the core data set.”

The WHO recommends these COVID passports for work, education and international travel, among other uses.

The WHO plans to “guide countries and technologist[s] in how to develop or adopt digital systems in support of verifiable proof of test results.”

This “digital credentialing” will be used “by authorized health workers for ongoing clinical care, early detection and infection containment measures” like tracing, tracking and restricting your medical treatment and movements.

Tyrannical politicians can and will use this information to not only track and trace you, but also to control your personal travel—domestically and internationally.

In 2020, Illinois Gov. J.B. Pritzker issued an executive order stating people would not be allowed to worship in churches beyond 50% capacity until they were vaccinated sometime in 2021. Liberty Counsel stopped Pritzker’s anti-church tyranny by dragging him to the U.S. Supreme Court!

Vaccine or digital health passports present the most serious current threat to our freedom. Any other medical or nonmedical information can be added to such a system, including your financial and other personal information that can be used to crush your freedom.

The Biden administration has already developed plans for vaccine passports, as evidenced by a March 2, 2021, PowerPoint presentation, a copy of which is in Liberty Counsel’s possession.

Now, 25 states and the District of Columbia, including several red states—Arizona, Mississippi, South Carolina, Oklahoma and Utah—have or are considering vaccine passports to restrict your freedom.

We must not give up our freedom or our privacy so easily. The push for a digital health passport is a much bigger issue than COVID. I can confirm that this agenda was in the works long before COVID arrived on the scene. Urge your state and federal leaders to stop COVID credentials, vaccine passports and freedom-killing mandates.

Liberty Counsel continues to fight for religious freedom on

multiple fronts. Our massive class-action lawsuit representing military service members against the Biden administration returns to court April 11.

We continue to fight for religious freedom in numerous other cases before the courts, including our cases representing health care workers in New York, Maine and Illinois.

Oral arguments occur this month in our defense of Sandra Merritt, the whistleblower charged with massive civil and criminal penalties for exposing Planned Parenthood's horrific baby parts for sale scheme.

And yesterday I presented oral argument before the Court of Appeals defending Calvary Chapel of Bangor against Maine Gov. Janet Mills' illegal church shutdown orders.
