

Help Vision for Israel Aid Victims

The people of Israel are suffering under a firestorm of terrorist missile attacks. Stand with them and help Vision for Israel bring comfort and aid to meet their urgent needs.

Together we must help our suffering Israeli brothers and sisters:

- We are distributing additional financial vouchers so people can stock up on supplies like nonperishable food, baby items, and first aid kits, especially for days when rocket attacks confine them to home.
- We will give financial donations to organizations working on the front lines, dealing with children suffering from trauma.
- We will make deliveries to believing congregations from our supplies, so they can give them directly to the needy in their local areas, both believers and unbelievers.

This situation has been brewing for some time. After the citizens in Israel's south endured more than 900 rocket attacks this year, the Israeli government felt they could no longer stand by and let innocents be killed. The intelligence service located Hamas terrorist chief Ahmed Jaabari, mastermind behind thousands of rocket attacks and the kidnapping of . soldier Gilad Shalit, and the . killed him in an air strike.

Hamas declared that they are "at open war" with Israel and have since been sending even more rockets into Israel. Because of new weapons technology given to Hamas by Iran, these attacks are now more devastating and dangerous. Rockets attacks have reached the suburbs of Tel Aviv, and perhaps even more alarmingly, near the nuclear reactor at Dimona.

While a ground assault has not begun, troops have been massed at Israel's southern border. Now that Egypt is controlled by the Muslim Brotherhood, no one knows if this could escalate into a full scale war with the surrounding Arab nations.

Please pray for peace. And let our actions also be a form of prayer. Now more than ever, the people of Israel need the help of those from all nations who follow the God of Israel.
