

How the Forced Jab Rendered This US Army Soldier Permanently Disabled

Read Time: 2 Minutes 59 Seconds

If you are injured by the COVID shot, YOU will have to pay for all the medical care arising from the damage these largely untested shots did to your body.

That's what happened to Caleb*, a soldier in the U.S. Army who is now permanently disabled by Joe's forced jab. But neither Joe nor the military will pay Caleb's medical bills. One of the expert witnesses in our massive lawsuit against the Biden administration explains why today, in a testimony you do not want to miss. Read on.

Caleb did not want to get the COVID shots. But the U.S. Army command, as well as his "Commander in Chief," mandated the shots for all U.S. military personnel beginning Aug. 24, 2021.

At the time, all branches of the military required service members take the COVID jabs or be dishonorably discharged. Such a discharge status is the equivalent of a civilian felony conviction and carries much the same stigma.

Caleb did not know he had a choice. Unwilling to risk his good name and exemplary record, he took the jab. It was a terrible mistake.

As a result of the largely untested EUA (Emergency Use Authorization) drug the Army forced him to take, Caleb developed myocarditis and suffered a massive heart attack requiring emergency open heart surgery and a stroke that left him partially blind.

But that was not the worst of it! Despite having forced Caleb

to take the shot, the Army is now firing him and refusing to pay the medical bills related to his shot-induced injury and permanent disability!

One of the expert witnesses in our lawsuit against the Biden administration is very familiar with the problems Caleb and other shot takers are facing.

Dr. Peter McCollough is an expert in cardiology, internal medicine and epidemiology. Suffice it to say that Dr. McCollough is one of the most experienced cardiologists and experts on COVID in the world.

He is also one of our witnesses in our lawsuit defending the military against Joe Biden's unlawful shot mandates.

What Dr. McCollough revealed in his sworn testimony is shocking ...

Per the Centers for Disease Control (CDC), the original COVID virus that the shots were developed for is now extinct. In fact, the CDC revealed this in June 2021—two months before Joe Biden ordered all military personnel to take the jab.

As a result, all the “vaccines” developed for COVID are largely useless against the latest variants of the virus.

The spike protein caused by the “vaccine” has been scientifically proven to injure vital organs such as the brain, heart, lungs, as well as damage blood vessels and directly cause blood clots.

Because these “vaccines” infect cells within these organs, the generation of spike protein within heart and brain cells causes the body's own immune system to attack these organs.

Because the U.S. military clinics, vaccine centers, CDC, FDA (Food and Drug Administration) and the vaccine manufacturers require the COVID vaccine recipient to grant indemnification on the consent form before injection, all shot injuries

incurred by the person are at their own risk and expense.

That is exactly what is happening to Caleb. The Army forced Caleb, under threat of penalty, to take the COVID jab. But now that the COVID jab has permanently disabled Caleb, he has NO recourse. Neither his insurance, nor the vaccine manufacturers, nor the U.S. Army will pay for the medical care Caleb needs because of that disastrous shot.

For these reasons—and many more—in his 35-page sworn expert report, Dr. McCollough unequivocally states that “no one should be pressured, coerced, receive the threat or reprisal or be mandated to receive one of these investigational products against their will.”

Dr. McCollough is correct. The shots are now scientifically proven to be ineffective AND dangerous. The COVID jabs never should have been mandated in the first place. Liberty Counsel WILL present this in court, and we will not rest until every service member is free of Biden’s dangerous and unlawful mandates.
