

Israeli Scientists Verify Miraculous Bible Event

Israeli scientists have discovered evidence for an event recorded in the Bible that took place thousands of years ago.

University researchers in Israel say they now have proof that a miraculous event recorded in the book of Joshua undoubtedly occurred.

According to Scripture, the sun stood still, enabling Joshua to lead the Israelites to victory in the Land of Israel. Israeli scientists have concluded, based on new research, that the event indeed took place, and they were even able to verify the exact date and time.

How do they define the occurrence in scientific terms? Click here to watch the video and find out. {eo}
