

Kim Clement Returns to Hospital With Brain Aneurysm

Prophetic voice Kim Clement returned to the hospital on Dec. 1 when doctors found a small aneurysm, according to Facebook posts from his daughter Donne.

Despite Kim's recent health issues, including a brain bleed, the Clement family says they are believing for a supernatural intervention.

"We have seen God reveal Himself so powerfully with UNUSUAL MANIFESTATIONS even this past week as Kim suffered another apparent 'setback,'" one post reads. "But is this really a setback, or is this a SETUP for God to show up, show off, take all the credit, and do something unusual?"

Donne writes that Kim's aneurysm was likely caused by an infection in the heart, and doctors will do more tests in the next few months.

Kim's daughter also writes a recent CT scan reveals the swelling in Kim's brain has improved.

"We are seeing God's Hand upon my dad and we are grateful, and fervent in our prayers and faith. Thank you for standing with our are overwhelmed," Donne writes.
