

Kong Hee 'Immersed in Joy of the Lord,' Heals Crippled Man

A man attended a Kong Hee rally only to find Jesus Himself shining through the pastor and came away with a nearly unbelievable story.

The man, lawyer Marcel Jude, recently shared his testimony on Kong's Facebook page.

"Early last September 2015 in the first week or so I was plagued with a very sharp pain in my left leg at the joint area, Jude begins. Though the pain decreased with medication, "it never left for 6 months until last night. In the beginning mobility was very difficult. I even used a walking stick. But eventually and slowly I didnt need it anymore but the pain though reduced and bearable never really left."

Jude says he was attending Kong's rally out of curiosity after the pastor's legal woes.

But the man before him was far from the man Jude anticipated meeting.

"I expected to see a man in very sombre mood. Instead here was a man who was totally immersed in the joy of the Lord. He seemed to be the happiest person in the auditorium. I could not believe it. Either he was in a state of divine joy or a raving lunatic in a state of denial!" Jude says of Kong.

What happened next is a miracle:

During the service the Pastor begin to pray for sick people and told everyone to place their hands wherever it was they were sick... ie heart, cancer, skin diseases etc. He didnt say anything about joint pain or legs etc.

Anyway I just placed my hand on my right leg as a matter of formality so to speak. I didnt expect anything just a routine response when someone prays for the sick at conventions or meetings. We were standing for long periods and I did feel tired but suddenly I felt like some pressure of the pain was gone I touched the area of my leg and it felt like different. I started moving my leg around and bending it something I had avoided for nearly 6 months. There was no knee jerk pain to stop bending or moving. I pulled out the knee guard. I could still feel the sore part where the bone met the skin but it was more like tiredness pain instead of constant pain.

Days later, Jude says he still has no pain or discomfort.

"I am trying as a lawyer to report facts without drawing conclusions. You can draw your own," Jude says.
