

Liberty Counsel Helps 2,500 Soldiers Gain Freedom

Thursday, Joe Biden issued an executive order *forcing* federal employees and contractors to get the COVID shots.

“As part of the vaccination push, the Department of Defense, the Department of Veterans Affairs, the Indian Health Service and the National Institutes of Health will complete implementation of their previously announced vaccination requirements that cover 2.5 million people.”

In a press conference held Thursday, White House Press Secretary Jen Psaki told reporters that federal workers who refuse to take the jab will be forced into “counseling and progressive discipline.”

When we obtained the Biden administration’s PowerPoint outlining such a plan on March 2, we warned this was coming. Psaki denied forced shots and vaccine passports were coming. We told you then that she was lying.

Meanwhile, Biden’s CDC has quietly changed the definition of “vaccine”—again. Prior to 2015, the CDC defined a vaccine as a drug that “prevents disease.” But under the Obama/Biden regime, the CDC changed that definition to “produce immunity” without the *preventing disease* language.

But now, due to the fact that the COVID shots neither prevent disease nor provide immunity, CDC says a “vaccine” produces “protection.”

This is a classic Orwellian ploy to change words and definitions. Meanwhile, more than 650,000 adverse reactions have been reported to the U.S. vaccine tracking system, VAERS. And more than 1.5 million adverse reactions have been reported to the European Union’s vaccine injury reporting system,

EudraVigilance.

These COVID shots have caused more injuries and deaths than any other “vaccine” in history ... but Joe Biden is fanatical in his demand to put a jab into every arm.

We are now working with over 20,000 requests for help. The volume of requests for help is overwhelming! The military is the latest target.

An active-duty soldier was told to “get the jabs today or get ready for general discharge. He only had [a] few weeks left in the Army.”

We provided our research that shows there is no FDA-approved COVID shot available in the U.S. So military families formed a group to push back.

After providing our research to the families, a soldier presented “the legal argument to the commanding general.” This soldier provided the same information to the military installation’s “vaccine clinic,” and he was “able to sway over a hundred soldiers to not receive the shot!”

But the News Gets Better

“The command changed their tune.” Service members at the installation were then informed by their command that there were “NO FDA-approved shots on site.”

Therefore, “all soldiers had a choice to take it or not, and if they chose not to take the shot, there would be no legal ramifications, no counseling statements and they couldn’t be forced to take the vaccine.”

“Over 2,500 soldiers were able to walk away today without the vaccine!”

This is a huge victory, but there are hundreds of military bases with armed service members pleading for our help.

Our service members fought, bled and died for our freedom.
They are not lab rats. They have rights! {eoa}
