

‘Mighty Fist of God’ a Sign of the Times?

With a quick snap of the sky, weather blogger Rogerio Pacheco launched worldwide comments about God reaching down to earth.

His photos of a fantastical cloud swirled with orange, yellow and black looks like the “mighty fist of God.”

“As soon as I saw the sky, I was immediately intrigued and I just had to grab my camera to take photo,” Pachero said, according to several reports. “I was not the only one who seemed to notice it and I could see other people also looking up at the sky. For me, the cloud looks like an outstretched hand with a fireball.”

The cloud appeared over the Portugese island of Madeira earlier this week.
