

# On the Verge of History: Noah's Ark Hunt Reaches Pivotal New Point

Are we about to see Noah's Ark finally unveiled?

In a compelling video, NBC correspondent Keir Simmons spoke with Christian researcher Andrew Jones from California, who has been hard at work on this project with Noah's Ark Scans. According to Jones, the formation's dimensions match the biblical account. "Genesis 6 describes a boat 300 cubits long," he explained. "Using the Egyptian cubit, that's about 515 feet, or roughly 157 meters—exactly the length of this boat-shaped object."
