

# Paul Osteen Is Living Out Matthew 25 in the Most Incredible Way

Like his famous preacher brother and their Spirit-filled pioneering parents, Paul Osteen is heavily involved in ministry. His work is just on the other side of the globe in areas so remote that people would die without his aid.

As a trained surgeon and medical missionary, Osteen works in both the natural and supernatural. The labor of his hands, though, is nothing short of miraculous.

"I am in the healing profession that was started by God as Jehovah Rapha many, many years ago, and is continued by Jesus 2000 years ago," Osteen says.

"I think what God does, through doctors, industry medicines, and as through surgery is an important part of the healing process. God can supernaturally heal. We know that my mom was healed of cancer 35-40 years ago. But you know what, He also uses physicians," Osteen says.

"And I'm going to believe Jehovah Rapha is the one that's going to heal me when I go out in the bush and take care of people. I feel like I'm doing the work of the ministry, the healing ministry of Jesus," he says.

Listen to the podcast to hear more of his amazing story—and how you can get involved.
