

Perry Stone Issues Urgent Prophetic Warning

Scientists are now preparing for “extreme volcanic” activity, which could change the face of the earth, according to the latest findings from the European Science Foundation.

For prophet, evangelist and author Perry Stone, the study echoes prophecies laid out in Joel 2.

Stone issued a prophetic alert through Facebook, warning fans and followers of how biblical predictions parallel the scientific discovery.

“If you recall when I was teaching on the Blood Moon cycle, Joel 2 indicated it will be accompanied by ‘Signs in the earth beneath; blood fire and vapor of smoke,’ which are volcanic eruptions. A scientific report just released said there are more eruptions and shakings under the earth now than in the past 300 years,” Stone writes.

The study focuses on “extreme geohazards”—including earthquakes, volcanoes, tsunamis and more—which are undergoing a 300-year period of extreme volcanic activity, according to *Tech Times*.

To prevent devastation from natural disasters, scientists are urging people to participate in “adaptation and migration” efforts. The entire globe is at risk—even the United States with the volcano in Yellowstone.

“Based on Joel 2:28-29, this is a definite indicator linked with the cosmic signs of a darkened sun and blood moons. However, the same prophet said at this same time we would see a mighty outpouring of the Spirit upon our sons and daughters, ‘before the great and dreadful day of the Lord’ (the Tribulation),” Stone writes.

“Paul said in Heb. 12 that God would shake the heavens and the earth once more, so that which cannot be shaken would remain. Our faith must be firm and our prayer life steady as we see numerous events unfold!”
