

The Chilling CDC Plan for COVID Isolation Centers

Note: The Centers for Disease Control has released a chilling plan to remove mild to moderate COVID-positive people and people they think might have COVID from their homes and “isolate” them away from family. As shocking as it sounds, the document is on the CDC website.

Anthony Fauci has said there are “two Americas.” The media and some politicians are dividing people by whether they received the shots or not.

History documents that Hitler blamed diseases and the Black Death on the Jews. He then prevented them from certain employment, and then their private businesses were identified and boycotted. Next came isolation, then the ghettos and then the camps.

We’re already hearing some of what the Jews heard in the 1930s and ’40s. CNN’s Don Lemon, NYC Mayor Bill de Blasio and former Obama Homeland Security Assistant Secretary Juliette Kayyem, whose article was published in *The Atlantic*—owned by billionaire Laurene Powell Jobs, the widow of Apple founder Steve Jobs—have publicly said those who refuse the shots should be:

- Fired, and lose all income, health benefits and retirement.
- Banned from grocery stores.
- Refused restaurant dining, shopping, entertainment, gyms and so forth.
- Expelled from schools.
- Placed on a no-fly list.

– And even prohibited from outdoor gatherings.

This is *not* right. We must help these people who are being forced to get the shots or be fired, expelled or court-martialed.

The CDC “shielding” plan calls for using schools, churches, shipping containers and even moving people into *your* house to forcibly detain people with COVID. Showing scant concern for the emotional trauma, the CDC states:

Separating families and disrupting and deconstructing multigenerational households may have long-term negative consequences. Shielding strategies need to consider sociocultural gender norms in order to adequately assess and address risks to individuals, particularly women and girls.

Restrictive gender norms may be exacerbated by isolation strategies such as shielding. At the household level, isolating individuals and limiting their interaction, compounded with social and economic disruption has raised concerns of potential increased risk of partner violence.

Households participating in house swaps or sector-wide cohorting are at particular risk for gender-based violence, harassment, abuse, and exploitation as remaining household members may not be decision-makers or responsible for households needs.

The CDC has the audacity to suggest that people could be forcibly moved around to isolate the sick and the well in private homes!

And the CDC even mentions the use of shipping containers, which is what African countries like Eritrea use to lock up and persecute religious people to force them to abandon Christianity. Eritrea is the third-worst place in the world for religious persecution. But this is *America*, not Eritrea!

The CDC even outlines a plan to split up families and place children with “adequate” caregivers! We are not making this up. This is on the CDC’s website, and we have archived the content in case it is removed.

Forcing people to take the COVID shots against their will is wrong! But something much bigger than a virus is afoot.

Some people are calling our office, sobbing. We are working through the evening and on weekends to help them. Your support through prayers and donations is what enables us to fight.

We are under the biggest influx of requests for help that Liberty Counsel has ever faced! And each one is an urgent, critical situation with which people desperately need help.

– “We are seeking help,” one woman wrote. “I am being forced to take the covid vaccination and I am 17 weeks pregnant. If I do not comply, [my hospital] will terminate my employment. My husband is also an active-duty soldier who does not wish to take the vaccine.”

– “I am a 3rd year podiatry student at [school],” another person wrote. “We have been informed that we are unable to participate in specific clerkship and clinic experiences if we do not have the COVID shot [and] ... we will be unable to graduate.”

We are facing one of the most serious threats to freedom in our history.

The real data does not support forced shots. VAERS reports as of Aug. 6 show that among the 571,830 total adverse reactions, there have been 12,791 deaths, 5,590 heart attacks, 24,305 severe allergic reactions, 16,044 permanent disabilities and much more. And VAERS dramatically underreports actual adverse reactions.

Moreover, the data also shows that the shots are not very

effective in preventing the delta variant, thus the reason the CDC is moving forward with a so-called “booster.” The booster won’t protect against the variants any more than the original shots.

This is about control. We will not be silent on my watch. We have helped thousands of people with exemptions. But this is just the tip of the iceberg. We need your help. We need your prayers, and we appreciate your support.

Our staff is working many overtime hours to help people who are facing deadlines. Without the Lord’s blessing and encouragement, we could not achieve the impact we are having. All praise to Him!

A growing number of states are also pushing back against mandatory vaccine passports. Demand freedom through your urgent fax to key decision-makers now.
