

This Glimpse of God's Beautiful Creation Will Wow You

Frenchman Thomas Pesquet has a lot of hobbies. He is a black belt in judo. He enjoys basketball, jogging, swimming, squash and outdoor sports such as mountain biking, kite surfing, sailing, skiing, scuba diving and skydiving.

He even plays the saxophone.

But as an astronaut, Pesquet has been able to nurture another love of his—photography. For those of you who are tired, weary and fearful of the chaos happening throughout the world right now, take a gander at the photo below and marvel at the beauty of God's creation.

Pesquet, an engineer with the European Space Agency and a member of the SpaceX Crew-2 mission, which launched in April, took this photograph of the earth, snapped from the cupola of the ISS, reports .

A night picture from the Cupola: sometimes star lights battle it out with city lights for who's the brightest and more beautiful. #MissionAlpha

– Thomas Pesquet (@Thom_astro) September 5, 2021

“Pesquet's view of the Earth sees city lights ‘battle it out’ with the light from distant stars,” reports . The orange band around the Earth is, according to astronomer Juan Carlos Munoz, the emission of sodium atoms, approximately 90 kilometers above the Earth's surface.”

It is simply breathtaking. {eoa}
