

Top of the Week: 60-Year-Old American Mom Flies Halfway Around the World to Rescue 10 Afghan Girls

Here's a brief sampling of the top stories featured this week on :

60-Year-Old American Mom Flies Halfway Around the World to Rescue 10 Afghan Girls

If you don't think there are any heroes who took action to save lives right before the Afghanistan debacle, think again.

An Oklahoma mother of 11 took it upon herself to rescue 10 members of Afghanistan's all-girls robotics team. She flew to Qatar earlier this month to try to get some of the girls to safety before the Taliban surprised the Biden administration by swiftly taking over the entire war-torn country.

What's even more amazing is Allison Reneau is hoping to save even more girls before the Taliban, known for their brutal treatment of women and religious minorities, has free rein to implement totalitarian Islamic sharia law.

The Chilling Plan for COVID Isolation Centers

Note: The Centers for Disease Control has released a chilling plan to remove mild to moderate COVID-positive people and people they think might have COVID from their homes and "isolate" them away from family. As shocking as it sounds, the document is on the CDC website.

Anthony Fauci has said there are "two Americas." The media and some politicians are dividing people by whether they received the shots or not.

History documents that Hitler blamed diseases and the Black Death on the Jews. He then prevented them from certain

employment, and then their private businesses were identified and boycotted. Next came isolation, then the ghettos and then the camps.

Prophetic Dream: Urgent Warning for Intercessors to Divert Financial Attack

I woke up this morning from a very vivid prophetic dream in which the Spirit of the Lord instantly gave me the meaning. This dream was both disturbing and encouraging and is an immediate call to intercession for the body of Christ. It was a warning, but the Lord told me we could avert disaster, an undesirable consequence, if we pray and intercede.

In my dream, there were many Christians gathered in a room. They were gathered together for worship and prayer. The building was large and packed with too many people to count. There was a huge storm and a tornado passing through, but the tornado took its time. It was not passing quickly. It was not reaching the building where the people were gathered. They could see it coming. They could feel it in the atmosphere, but at this time it was not prospering against them. People started asking when it would be over. The tornado had not yet reached the building. Its speed was so slow it was as if it was being held up by something.

The Spirit of the Lord revealed that the tornado was destructive but could be held up and not come by if we prayed and interceded. I saw the width of this tornado as a Category 2. It expanded wide over this field by the building. The highlight of this prophetic dream was that this storm would have a direct impact on Christians. In the dream, the tornado was being held up, but then I heard the Lord say, "You have a choice. Christians have a choice if this tornado is going to hit."

Italian Student Has Working Bar Code of COVID-19 Certificate Tattooed on Arm

Could this be the prelude to the biblical mark of the beast?

You be the judge.

A 22-year-old Italian student became an overnight internet sensation when he posted a video on TikTok after having the bar code of his COVID-19 certificate tattooed on his arm, several news outlets are reporting.

Andrea Colonna says he “hadn’t given much thought in advance before getting his latest tattoo, but decided on the topical—and practical—choice after talking it over with tattoo artist Gabriele Pellerone.”

Georgia Doctor Refuses Care to Unvaccinated Patient

A Georgia pulmonologist has chosen to withhold much-needed medical attention from one of the patients under her care because the patient has not taken the COVID vaccination. The patient’s daughter, whom we’ll call “Cynthia,” came to us for help with her father’s vexing situation.

“My father who is under continual care by a pulmonologist for an ongoing medical issue is being refused care by the pulmonologist for not being vaccinated with the COVID vaccine,” she writes, noting that his refusal is based on both religious and medical concerns.

The doctor is “refusing care because he is unvaccinated,” Cynthia adds. “I believe this is medical abandonment.” {eo}
