

VIDEO: Lila Rose Shows Late-Term Abortionist's Murderous Practices

Pro-life organization **Live Action** released a second undercover video Monday, revealing how leading D.C. late-term abortion doctor Cesare Santangelo would leave a baby struggling for life after a **failed abortion** to die.

"Hopefully we'll get this pregnancy out intact, but it doesn't always happen that way," Santangelo said to an undercover Live Action investigator who was 24 weeks pregnant. "I try and sever the umbilical cord first, and we wait for that to stop pulsing, and this way the fetus is expired first."

Live Action President Lila Rose notes: "It has become blatantly clear through this investigation that **Kermit Gosnell** is not alone in his disturbing **late-term abortion** practices. These gruesome practices are rampant through the abortion industry in America."
