

WATCH: Fourth Planned Parenthood Video Reveals Some of the Most Disturbing Footage Yet

Editor's Note: This content is graphic. Please use your discernment when watching the video.

The revelation that Planned Parenthood was selling fetal tissue that abortionists avoided “crushing” was sickening.

But the atrocities have grown as more videos are released from the Center for Medical Progress.

In the fourth video, undercover “buyers” ask about receiving “intact specimens” from second-trimester abortions.

Dr. Savita Ginde tells the buyers that less than 10 percent of the tissue is totally intact, unless someone delivers before the abortion can be completed.

And then: “Oh, look, here (are) some organs for you. They’re all attached. Here’s a stomach, heart, kidney, adrenal ... I don’t know what else is in there.”

Watch the video to see what other horrendous acts the abortion giant is doing through the sale of unborn children.
