

Will a New World Order Be Inked This Week?

Nations are drowning in unparalleled levels of debt, fears of economic calamity are growing and global leaders such as Pope Francis are warning that the world has entered the “last times” and is at the beginning of a “piecemeal” Third World War.

To address these crises, world leaders are meeting Friday through Sunday at the United Nations to consider a 15-year plan titled, “Transforming Our World: The 2030 Agenda for Sustainable Development”—a proposal some experts believe could be the first step toward the global state and cashless society predicted by the biblical prophets.

“The real agenda of the globalist elite through all these ‘sustainable development’ and ‘social justice’ programs [is] to create a new global state,” says Paul McGuire, a Fox News and History Channel commentator and co-author of *The Babylon Code: Solving the Bible’s Greatest End-Times Mystery*.

“We read in the book of Revelation that in the last days Babylon will return as a ‘born again’ world government, religion and economic system. What is happening now with the United Nations is Babylon rising again before our very eyes.”
