Here's a quick rundown of the top stories on :

The Eclipse: Is This America's 'Nineveh Moment'?

Millions of skywatchers have gathered along a narrow corridor stretching from Mexico to Canada, eagerly awaiting today's total eclipse of the sun.

Almost everyone in North America will be guaranteed at least a partial eclipse, weather permitting.

Unfortunately, some areas could only see clouds. The best weather is expected in New England and Canada.

What Does the April 8 Eclipse Mean?

"... And God said, "Let there be lights in the sky to separate the day from the night, and let them serve as signs ..." (Gen. 1:14).

On Monday, Apr. 8, 2024, the United States will witness the third total eclipse within a seven-year period. This is the first time in over 1,000 years that any nation has seen something like this. The paths of the three eclipses over our beloved nation form the Hebrew letters that represent the first and last letters of the alphabet ... the beginning and the end ... the Alpha and the Omega ... which is also one of the names the Lord God gives for Himself (Rev. 1:8).

Could God be giving us a sign from the sky? Is He giving us a

heads-up warning that time is running out for our nation? In a significant way, God is the Alpha of the United States of America. He is our beginning. We were founded as “one nation under God.” Is He now putting us on notice that He is also our Omega? Is He warning us that the end is near for America as we have known her?

Is It Just a Coincidence That a Magnitude 4.8 Earthquake Hit Our Largest Metropolitan Area Just Days Before 4/8?

Oh, is this a question that I am not supposed to be asking? Following the earthquake that shook up the Big Apple on Friday, a lot of people were suggesting that it seemed really weird that a magnitude 4.8 earthquake would hit our largest metropolitan area just days before the Great American Eclipse of 2024 passes over the United States on 4/8.

It isn't as if New York regularly experiences these sorts of quakes. In fact, it is being reported that this was the largest earthquake in New York City since 1884. So the truth is that this was a very rare occurrence. And we are just supposed to believe that this extremely rare earthquake that just happened to be precisely magnitude 4.8 has absolutely nothing to do with the Great American Eclipse on April 8?

OK.
